+639763999551

An aspiring IT professional with a strong programming foundation and a track record of success in regional competitions.

Work Experience

FarmFinds - Department of Agriculture XII

September 2023 - April 2024

Marbel, Philippines

- Young Farmers Challenge Start-Up Provincial Level 2023 – Winner
- Built an e-commerce app for the Department of Agriculture, connecting local farmers and customers for the sale of vegetables and fruits

Facial Scanner - Freelance Developer

January - March 2024

Tupi, Philippines

- Developed a Flutter app using TensorFlow Lite and SQLite for facial analysis, including gender, skin tone, attractiveness rating, and emotion detection.

Mechaniconnect - Freelance Developer

April - May 2024

Marbel, Philippines

- Built an app that connects customers with mechanics for on-site car repairs.
- A mobile platform for users to request and receive car maintenance services.

MaxTracks - Max Shipping

June - December 2024

Honduras, Central America

- Developed mobile app for comprehensive package tracking, enhancing inventory management for Max Shipping across multiple locations.
- Implemented barcode scanning and cloud storage, improving operational efficiency and reducing errors in package handling and billing.

Hoya Job Search - Nebulex

August - November 2024

Sydney, Australia

- Converted an existing web-based platform built with JavaScript and .NET into a cross-platform mobile application using Flutter.
- Integrated REST APIs and implemented OAuth2 authentication to securely connect the mobile app with the backend system, ensuring data consistency and user security.

Fuzion+ - Nebulex

December 2024 - April 2025

Sydney, Australia

- Built Fuzion+ using Flutter with native platform channels (Swift IOKit APIs, C++ Windows PDH/WinAPI), creating a cross-platform desktop app with real-time system monitoring (CPU load, RAM, network, disk, battery status) featuring advanced CPU temperature detection via macOS SMC access.
- Implemented sophisticated multi-window architecture with background tray management, automated reboot scheduling using LaunchAgents/Task Scheduler, real-time event streaming for battery monitoring, and cross-platform UI adaptation with native component integration.
- Integrated Nebulex enterprise customer portal API for dynamic settings synchronization and developed comprehensive support ticket system with structured categorization, enabling streamlined IT support workflow through email-based ticketing integration.

HeyJag - Full Stack Developer

Florida, USA

April 2025

Overview

- Lead Flutter developer for HeyJag, a multi-service platform with customer and driver apps supporting ride-hailing, food delivery, and car rentals. Built scalable, real-time systems serving users across iOS and Android.

Key Achievements

- Built and launched two cross-platform applications (customer and driver) using Flutter and Firebase, supporting multiple on-demand services.
- Developed a geolocation-based driver matching system using Google Maps SDK with real-time GPS tracking and route optimization.
- Designed and implemented a real-time order management system with Firebase, handling order updates, driver statuses, and automated cancellation workflows.
- Integrated Stripe payments with support for saved cards, automated refunds, and seamless payouts.
- Built an advanced notification ecosystem combining FCM and local notifications for order updates, driver assignments, and delivery status.
- Implemented a modular repository architecture with separate data layers for rides and food orders, improving code organization and maintainability.
- Developed real-time location tracking with adaptive update frequencies for accurate ETAs and improved user experience.
- Optimized app performance and reliability through efficient caching, error handling, and API response enhancements.

Tech Stack

- Flutter, Dart, Firebase (Auth, Firestore, Cloud Functions, FCM, Storage), Google Maps SDK, Stripe API, Provider, Modular Architecture, REST APIs

Technical Projects

Smart Grade Viewer

June - September 2022

<https://github.com/Marrkkyyyy/smart-grade-viewer>

- Built a Flutter-based application enabling students to easily view their grades.
- Implemented user authentication and an intuitive interface for grade access.

Library Management System

November 2022 - February 2023

<https://github.com/Marrkkyyyy/library-management-system-python-tkinter>

- Developed a library management system using python, providing an intuitive interface for managing books and library records.
- Integrated features such as book borrowing and returning, user registration, and inventory tracking.

eVote

February 2023 - May 2023

<https://github.com/Marrkkyyyy/e-vote-system>

- Built a Flutter app for an electronic voting system

Education

Southeast Asian Institute of Technology, Inc.

BS in Information Technology, Cum Laude (2020–2024)

PSITS Most Outstanding ITE – Sole awardee from the graduating batch, recognized for excellence in academics, leadership, and contributions to the IT field.

Seminars & Workshops

Python Programming Seminar

- Attended a two-day seminar and workshop on "Tools for Rapid Web Development."

Start from the Scratch Web Development

- Participated in a web development workshop, enhancing skills in web development.

UNBOXING Hackathon: SarGen Startup Challenge

- Participated in a technopreneurship workshop, developing innovative solutions and pitching ideas.

Leadership Skills and Strategic Planning Micro Seminar

- Participated in a seminar focused on strategic planning, effective communication, and collaboration

Achievements

Hackathon Programming Competition 2023 – Champion

March 2023

- Achieved first place in the school-level hackathon for the IT department.
- showcasing expertise in C programming

PSITs Regional Programming Competition – Champion

April 2023

- Won first place at the 11th PSITS Regional Convention, ranking 1st out of 23 universities/colleges in Region 12.
- Utilized C language for the competition

DICT HACKFORGOV: Capture-the-flag Competition

September 2023

- Awarded Certificate of Excellence for demonstrating exceptional problem-solving and cybersecurity skills by achieving 3rd place in the DICT HACKFORGOV: Capture-the-Flag Competition

National IT Skills Competition 2024

April 2024

- Secured 7th place in the C Language category at the National IT Skills Competition among 28 participants, showcasing advanced programming skills

PSITS Most Outstanding ITE

June 2024

- Recognized as the Most Outstanding Information Technology Education student by the Philippine Society of Information Technology Students (PSITS)

Regional Startup Pitching Competition - Champion

July 2024

- Won first place in the SOX iTech Regional Startup Pitching Competition

Skills

Programming & Development

- Flutter, FlutterFlow, Python, PHP, C Language, HTML, CSS, JavaScript, Node.js

Backend & API Development

- REST API, API Integration

Database

- SQL (MySQL, SQLite, MongoDB), Firebase

DevOps & Deployment

- Azure DevOps, CI/CD Pipelines, Git Version Control

Software Principles

- Object-Oriented Programming, SOLID Principles

Cybersecurity

- Capture-the-Flag Techniques, Basic Security Concepts

Business & Leadership

- Startup Pitching, Technopreneurship, Leadership, Strategic Planning

Problem-Solving

- Competitive Programming, Algorithm Development
